RDP

Technical Data Sheet

Product Description

Product Name Redispersible polymer powder

YICHENG® RDP is a **redispersible polymer powder** produced by spray-drying special water-based emulsion, mostly based on vinyl acetate and ethylene. It dissolves in water easily and quickly forms emulsion.

HS code.: 3902100090

Protective colloid: Polypropylene Coating

Additives: Coating

Product Specification

Item	Index
Appearance	White powder, free-flowing
Solid content (%)	≥99.0
Ash content (%)	10±2
Bulk density (g/l)	450-550
Average particle size (μm)	80
pH value	7.0-9.0
MFFT(Minimum film-forming temperature) (°C)	5
Tg (°C)	3

For and on behalf of
HEBEI YICHENG TECHNOLOGY CO., LTD

Recommended Application

Coating

EIFS system mortar

Tile adhesive/ Tile jointfiller

Self-leveling mortar

Tip: The application above is only for reference. Actually the end-users usually find various applications.

Key Properties

Supply high flexibility

Increase adhesion strength

Improves workability

Improve water proofing of mortar

Reduce water absorption

Package & Loading& Storage

Bag: Polyethylene (PE) film bag enclosed in composite film bag waterproof. 25kg/bag

Load: 14tons (560 bags) in 1*20'FCL

25tons (1000 bags) in 1*40'HQ

Storage: Under well ventilated, cool and dry place, against direct sunshine and far away from fire.

Safety Note

(i.)The specification mentioned above is tested in accordance with our equipment and knowledge. Considering delivery and storage, it may affect product quality, so the buyer should test it as soon as it arrives at buyer's destination. (ii.) Due to different application conditions and regulations in different temperature, time or areas, the application is only for reference. (iii.) We reserve the right to alter our product and without informing in advance.
